

To whom it may concern:I am writting in regards to the attempt of the the National Association of Broadcasters to limit my ability to be able to be as informed as possible about local traffic and weather. These stations bring an invaluable amount of information 24 hours a day and 7 days a week. As an individual who lives close to the Washington, D.C. area, this is something that has been needed for a long time. Yes, it isn't free, but that is what we listeners are paying for.... the best in intertainment, sports, and information from coast to coast without interuption. When the Government wants to start providing the same level of service at no charge, then they might have the ability to control the programing i listen to. Until then, I ask that the FCC reject the NAB's petition 04-160, and that Congress oppose HR4026.
